Objective Looking to obtain a challenging career in software engineering that will allow me to grow my development skills.

Education **B.S. Computer Science** December 2009
University of Missouri-Rolla GPA: 3.390 / 4.0

Experience Tapestry Solutions January 2016 – Present
Software Engineer III

- Maintained a Secret level clearance
- Updated and maintained databases using Microsoft Access and SQL
- Worked to fix real time issues while interfacing with users at Development Evaluations
- Rearchitected legacy code using modern design patterns
- Integrated with external hardware devices
- Worked with, and consumed, WCF interfaces
- Wrote and maintained Unit Tests in MSTest using the Rhino Mocks Library
- Developed desktop applications using C++, and C#/WinForms/WPF
- Worked on teams following agile methodologies
- Wrote Software Functional Requirements/Software Use Cases
- Ran system level integration testing

Stauder Technologies Sept 2010 – December 2015
Software Engineer

- Maintained a Secret level clearance
- Communicated with Marines and government to distill software and system requirements
- Traveled to help support, and train Marines to use the applications
- Developed desktop applications using C++, MFC, C#, WPF
- Worked with the MVVM architecture pattern within C#/WPF
- Wrote bridge software between C++ and C# using CLI libraries
- Refactored and redesigned architecture using applicable design patterns
- Communicated with external systems using 3rd party APIs
- Wrote requirements for new software features
- Developed Android mobile mapping applications using Java
- Developed applications that talked over Military Combat Radios
- Maintained and updated databases using Microsoft SQL
- Helped create verify and run a government full system test over the course of 8 months

Cerner Jan 2010 – Aug 2010
Software Engineer - Support

- Communicated heavily with clients
- Collaborated with various development teams to best represent the client's needs
- Worked on an FDA approved medical device
- Interfaced with other systems through the use of HL7
- Identified and investigated defects in software written in Java
- Wrote extensive support documentation
